MODERN DECORATION

Today the universally accepted finish for bathroom fittings is chromium. To fill the need for chromium bathroom accessories, this wide range of surface-attached and recess type fixtures has been developed. A well balanced octagonal design is carried through the this entire line and harmonizes with the latest fittings of better manufacturers. The simplicity and beauty of design together with the finest obtainable chromium finish gives Marsh Bathroom Accessories instant appeal. These accessories are die cast from non-rusting metal, polished smooth and electroplated; first with copper, then with nickel and finally with heavy chromium. The die casting process produces a much closer grained metal than obtainable by sand casting, permitting sharper lines and polishing to a higher finish. The result is a fixture of beauty, durability and strength.

NEW EXCLUSIVE FASTENER

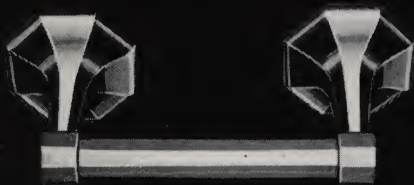

This simple device of concealed fastening developed especially for mounting Marsh Bathroom Accessories adds a final touch to the appearance and stability of the fixtures. *PATENTED* . . . This exclusive feature consists of an inverted saucer and a set screw at the bottom of each fixture (see detail). The inverted saucer is fastened to the wall with long screws then the fixture is placed over it by catching the lug back of the lip at the top of saucer. A set screw fitting back of the inverted saucer at the bottom holds the fixture securely in place (see detail). *EASILY* adjusted positive fastener that can be installed by anyone who can use a screw driver.

RECESS FIXTURES

By the die casting process all flanges of recess fixtures are an integral part of the curved shell, eliminating all possibility of open joints between the flange and body of the fixture. Recess Fixtures can be appropriately built into the wall by preparing a place for them before Marlite is applied. After Marlite is installed Recess Fixtures are held in place by key blocks and plaster paris.

MARSH

Bathroom

ACCESSORIES

Here is a complete line that adds the final decorative touch to the bathroom of today. The clearly defined lines made possible by the die casting process give these fixtures instant appeal. The simplicity reflects just the right note of contemporary design. These accessories like other Marsh Products carry a feeling of beauty that appeals to those accustomed to better things.

OTHER MARSH PRODUCTS

Marlite is the new Marsh Wonder Wall material that fits every need for beautiful sanitary wall covering. Its glossy surface resists acids and alkalis and is easily cleaned with a damp cloth. Marlite is available in large sheets of plain-colors, tile-patterns, wood-patterns and marble-patterns. Marsh Mouldings fit every requirement demanded of a decorative moulding for interiors.

MANUFACTURED TO QUALITY STANDARDS

These products meet specific requirements by virtue of the careful planning which precedes every Marsh product. Skilled craftsmanship, acquired through the 23 years of manufacturing, makes evident even to the critical eye the high quality maintained in this complete line of wall products. See these wall products at your dealers or write to the factory for further information.
